### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to the following:

10. **(Currently amended)** A method of using ~~the~~ a positive resist composition according to claim 1, comprising: applying the positive resist composition on a substrate to form a positive resist film, performing selective exposure of the positive resist film, conducting a developing treatment to form a resist pattern, and subjecting the resist pattern to a thermal flow treatment, thereby narrowing the resist pattern, wherein the positive resist composition comprises:

a resin component (A) containing an acid dissociable dissolution inhibiting group whose alkali solubility increases under action of acid; and

an acid generator component (B) that generates acid on exposure, wherein the resin component (A) is a copolymer comprising a first structural unit (a1) derived from a hydroxystyrene and a second structural unit (a2) derived from a (meth)acrylate ester containing an alcoholic hydroxyl group, in which 10 mol% or more and 25 mol% or less of a combined total of hydroxyl groups within the structural units (a1) and alcoholic hydroxyl groups within the structural units (a2) are protected with the acid dissociable dissolution inhibiting groups,

a weight average molecular weight of the copolymer prior to protection with the acid dissociable dissolution inhibiting groups is 4,000 or more and 8,000 or less,

a molar ratio between the first structural units (a1) and the second structural units (a2) within the resin component (A) prior to protection with the acid dissociable dissolution inhibiting groups is within a range from 80:20 to 70:30,

the second structural unit (a2) is derived from a (meth)acrylate ester containing an adamantyl group with an alcoholic hydroxyl group, and

the acid dissociable dissolution inhibiting group is a 1-lower alkoxyalkyl group.

Applicants in response to a 35 U.S.C. 102(f) rejection have amended the claims to recite only the method with the positive photoresist composition recited in the claims. The prior art reference to HOJO et al is overcome because the claims drawn to the method lack the electron beam exposure and now fails to anticipate the claimed invention over 35 U.S.C. 102(f).

Accordingly, claims 10 and 11 are seen allowable and passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Chu whose telephone number is (571) 272-1329. The examiner can normally be reached on Monday - Friday from 9:30 am to 6:00 pm.
